

MODEL 260

(Main Frame Part No. MF-60)

Basiloid Products is committed to customer satisfaction by producing a quality product. Therefore we have recently developed a new "single wide" attachment with added durability.

The Model 260 with its telescoping top extension makes it possible to "top-handle" folded cap cartons ranging from 18" to 84".

This unit also provides the flexibility of "top handling" or fork handling without removing the attachment from the lift truck.

Various styles, capacities and lengths of folding forks are available.
